Brand New Way to Remove Hairy Growths (Actually Removes Roots and All)

The vexed question of how to com-pletely banish superfluous hair has been solved at lant! By means of the new phelactine process, the hairs en-lire, roots and all, come out before your very eyes—easily, harmlessly, "quick as a wink." It is so different from the depilatory, electrical and shaving methods, you simply must try it to fully appreciate its remarkable advantages.

it to fully appreciate its remarkable advantages.

Phelactine is perfectly odorless, non-pritating, non-poisonous—a child could eat it without the least injury. It leaves the skin so soft, smooth and hairless, no one could tell you ever had a mountache or other hairy growth. It you will procure a stick of phelactine from your druggist and follow the simple instructions, you will certainly be automished and delighted with the result.
